

GRADINATA

LORENZO CASTILLO

VOLUME XI

“Each year, the inspiration behind my collection grows richer and more sophisticated. GRADINATA emerges from a desire to experiment with perception, seeking a more sensory and rational approach, where aesthetics and touch find harmony.

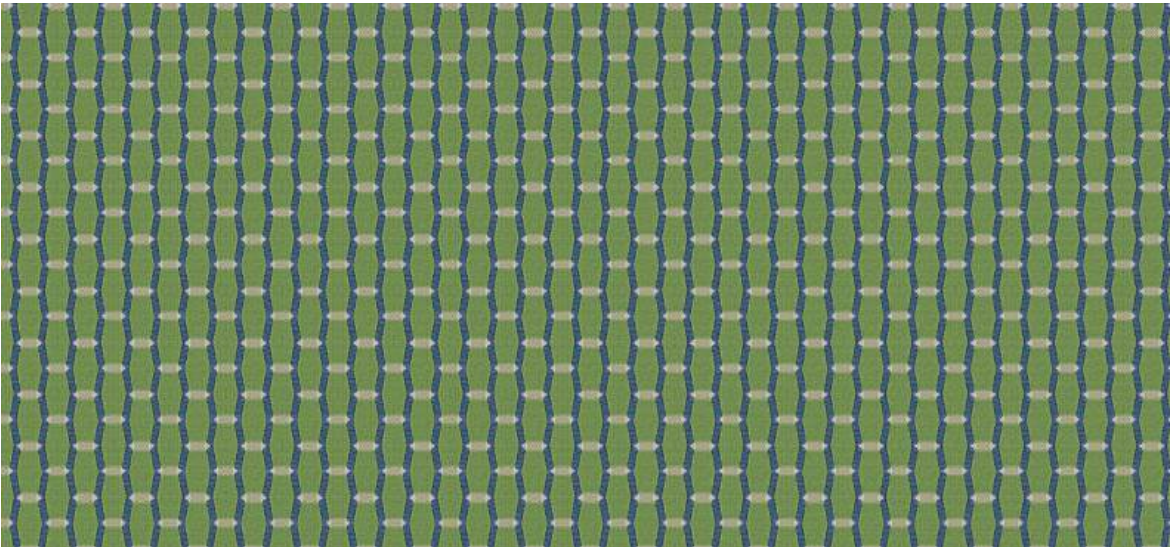

In this collection, rather than anchoring myself in artistic or historical references, I have chosen to blend geometric forms with three-dimensional designs. Texture takes centre stage in the collection: fabrics with body and softness, cuts that explore structure and dimension, and silks of an almost ethereal lightness. Similarly, the colour palette features subtle combinations where blues intertwine with greens and pinks merge with earthy tones.

My aim is to appeal to the senses and approach a concept of beauty that is more abstract, modern, and futuristic, in a quest to forge new paths of creativity.”

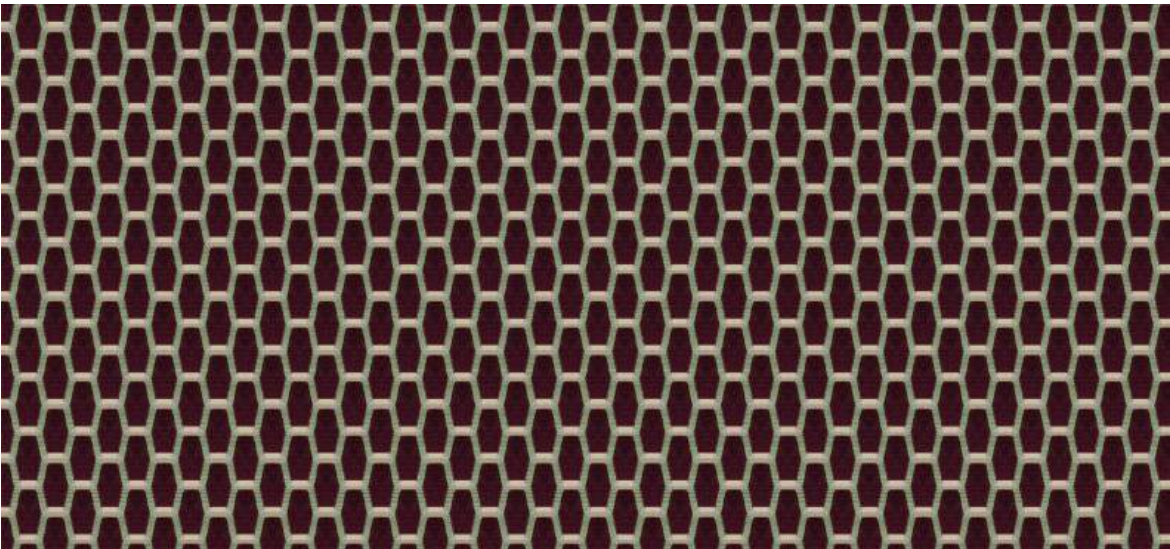

Lorenzo Castillo.
